Step 1 — Removing Rear Casing

- Flip the phone over so you are viewing the back.
- Using your fingernail, or an opening tool, pry open the notch that is located at the top of the phone.
- Carefully follow your finger or opening tool around the edge of the rear casing until it has detached from the phone.
- Set the rear casing aside for future use.

Step 2 — Removing the Battery

- ❗ The battery is the large grey and black rectangle.
- Using your fingernail, or opening tool, gently pry the bottom of the battery until it pops out.
- Place the old battery aside for now, or dispose of it properly.

Step 3 — Inserting New Battery

- Locate your new battery.
- Correctly orient the new battery to be inserted.
 - ❗ To orient the battery, make sure the 3 metallic bars align with the 3 prongs on the phone.
- Gently insert the new battery into the battery slot.

To reassemble your device, follow these instructions in reverse order.
